

GitHub Audit Report

Prepared By	AJ Dehn
Report Date	2026-08-01
Tests	4
Passed	1 (25.0%)
Failed	3 (75.0%)
Scope	Organization Name: itauditguy-training

Test Summary

Test	Result	Risk	Comments
github-repo-002: Repositories are configured to require an approval before the change is merged.	Fail	High	- Population: 6 - Passing: 2 (33.3%) - Failing: 4 (66.7%)
github-org-002: GitHub organization settings prevent members from creating public resources.	Fail	Informational	
github-repo-001: Repositories in the GitHub organization are set to private.	Fail	Informational	- Population: 6 - Passing: 0 (0.0%) - Failing: 6 (100.0%)
github-org-001: GitHub organization settings require users to enable MFA.	Pass	High	

BACK TO TEST SUMMARY

Test ID	github-repo-002
Test Description	Repositories are configured to require an approval before the change is merged.
Risk Rating	High
Test Procedures	1. Obtained a list of all repositories by calling: https://api.github.com/orgs/[org_name]/repos. 2. Saved the list of all repositories: repos/repos.json. 3. Obtained the branch protection rules from each repository by calling: https://api.github.com/repos/[org_name]/[repo_name]/branches/main/protection 4. Saved the branch protection rules: repos/[repo_name]/branch_protection_rules.json. 5. Obtained the rulesets from each repository by calling: https://api.github.com/repos/[org_name]/[repo_name]/rulesets 6. Saved the rulesets: repos/[repo_name]/rulesets.json. 7. Inspected each repository to determine if it was compliant with the test attributes below. Obtained the settings for each repository ruleset by calling: https://api.github.com/repos/[org_name]/[repo_name]/rulesets/[rule_id] 8. Saved the settings from each ruleset: repos/[repo_name]/rulesets/[rule_id].json.
Test Attributes	• An active branch protection rule or repository ruleset is enforced. • Pull requests require at least one approval before merging. • No unauthorized users, teams, roles, or applications may bypass pull request requirements. • Administrators are subject to branch protection requirements. • Direct pushes to protected branches are prevented.
Conclusion	Fail
Comments	Exceptions Noted. 4 of 6 repositories did not have branch protection enabled.

Repository Name	Conclusion	Comments
training	Fail	Pull request approvals are not required
bp-bypass	Fail	Administrators may bypass branch protection. Direct pushes may be permitted
ruleset-no-bypass	Fail	No branch protection rules or active rulesets configured. Pull request approvals are not required. Administrators may bypass branch protection

bp-no-bypass	Fail	Administrators may bypass branch protection. Direct pushes may be permitted
ruleset-bypass	Pass	
compliant-repo	Pass	

BACK TO TEST SUMMARY

Test ID	github-org-002
Test Description	GitHub organization settings prevent members from creating public resources.
Risk Rating	Informational
Test Procedures	1. Obtained the GitHub organization settings by calling: https://api.github.com/orgs/[org_name]. 2. Saved the GitHub organization settings: orgs/org_settings.json. 3. Inspected the organization settings to determine if they comply with the test attribute(s) defined below.
Test Attributes	• 'members_can_create_public_repositories' is set to false. • 'members_can_create_public_pages' is set to false.
Conclusion	Fail

BACK TO TEST SUMMARY

Test ID	github-repo-001
Test Description	Repositories in the GitHub organization are set to private.
Risk Rating	Informational
Test Procedures	1. Obtained the GitHub organization settings by calling: https://api.github.com/orgs/[org_name]. 2. Saved the list of GitHub repos: orgs/repos.json. 3. For each repo, inspected the repositories access settings to determine if it is set to 'private'
Conclusion	Fail
Comments	Exceptions Noted. 6 of 6 repositories were not set to private.

Repository Name	Conclusion	Comments
training	Fail	
bp-bypass	Fail	
ruleset-bypass	Fail	
ruleset-no-bypass	Fail	
bp-no-bypass	Fail	
compliant-repo	Fail	

BACK TO TEST SUMMARY

Test ID	github-org-001
Test Description	GitHub organization settings require users to enable MFA.
Risk Rating	High
Test Procedures	1. Obtained the GitHub organization settings by calling: <code>https://api.github.com/orgs/[org_name]</code>. 2. Saved the GitHub organization settings: <code>orgs/org_settings.json</code>. 3. Inspected the organization settings to determine if they comply with the test attribute(s) defined below.
Test Attributes	• 'two_factor_requirement_enabled' is set to true.
Conclusion	Pass
